H.E. Nana Akufo-Addo, President of the Republic of Ghana: "COVID-19 has changed the world. It has cost lives, battered health systems, and damaged livelihoods. But, through these challenges, we have seen the best of humanity exemplified through strong multilateral cooperation. Ghana welcomes the arrival of the first doses of COVID-19 vaccines through the COVAX AMC. This important milestone will allow Ghana to get back to business, and build back our economy even stronger than before."
